

Solar Security Camera Trailer

Goes Anywhere
Sees Everything

PASS Rugged Hardware

Visibility *and* Mobility

Our remote, solar-powered security camera trailer is the perfect solution for crime hotspots when you need a 24/7, high-profile presence and keep them guessing where you'll turn up next.

In Your Face

Equipped with red/blue strobes, floodlights and blaring two-way speakers for live talk-down or recorded message, our camera trailers are meant to be seen and heard.

On The Go

Rugged and deployable in 30 minutes, our trailer travels virtually anywhere and withstands the harshest environments. No wires, power or internet required.

Multidimensional

Thermal imaging and IR illumination for night surveillance. LPR, line crossing, human and vehicle detection, LIVE Streaming.

Smart Software

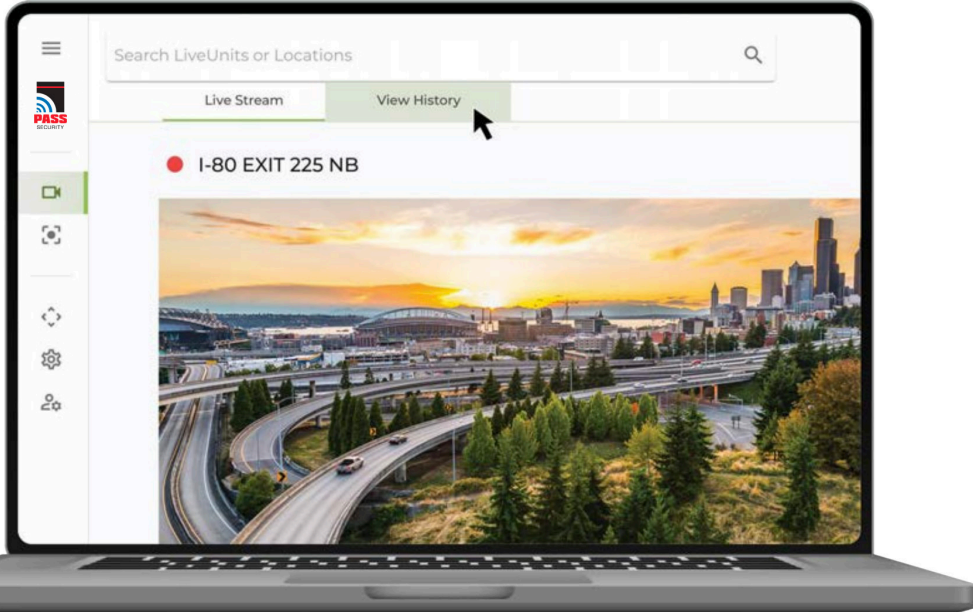

Our **Smart Software** uses pure-cloud, plus edge computing. This means your company does not have to build costly data centers or infrastructure, write software, or hire an IT support staff. Our infrastructure-as-a-service allows you to focus on your core competencies while maximizing cost-effective technologies. In short, let us be IT for your security so you can focus on what you do best.

Platform

Our video management system is a highly organized, cloud-based solution that ensures secure livestreaming and automatically archives videos without the need for costly IT infrastructure. It is accessible from any web browser and the mobile app. Furthermore, the programming in our software platform helps identify threats and alerts users when something requires their attention.

The **Smart Software** platform allows for:

- Camera manipulation
- View of live feeds
- Review of past recordings
- Transference of data
- Advanced security analytics

Head Unit

The head unit is where all of the magic happens. It houses the edge controller as well as the cameras, lights, speaker, and other sensors.

- 70-120° high resolution horizontal FOV
- Optical, IR illumination, and PTZ
- Human and vehicle detection up to 650 ft
- Maximum streaming resolution of 1920x1080
- 58° (PTZ) horizontal FOV per camera
- Two-way speaker
- Flood light and blue/red strobe lights
- NDAA and TAA compliant options

D3 HEAD UNIT

Capabilities and Functions

You decide which sensors and capabilities you need, everything from license plate recognition and IR illumination to fuel cell generators.

Other capabilities and functions:

- Intrusion detection
- Line crossing
- Dual bounding boxes
- Human and vehicle detection
- IR illumination
- Live stream
- Record and playback
- Security analytics
- Remote device management
- 2-way communication
- Flood and strobe lights
- Backup battery

Trailer Technical Specifications

WEIGHT	1,800 LBS
SUSPENSION	2,000 LBS AXLE & SPRINGS
TIRE SIZE	13*
POWER	24 V DC @ 24 WATTS (DISARMED) @ 36 WATTS (ARMED) @ 100 WATTS (MAX, FLOODLIGHT ON)
SOLAR GENERATION	800 WATTS
BATTERY BANK CAPACITY	460 AH

Dimensions

	DEPLOYED	TRANSPORT	TOW
LENGTH	10 3"	100"	13 5"
HEIGHT	2 6 4"	10 2"	10 2"
WIDTH	96"	67. 75"	67.75"
