Turn Your Security Cameras into **LIVE** Burglar Alarms

1.

Intruder Caught on Camera

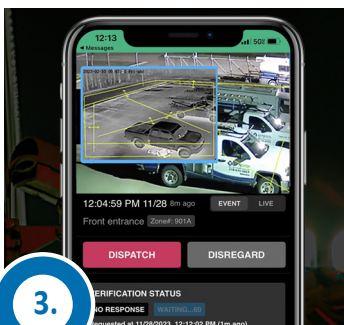

Advanced AI security camera analytics detect intruder on property within a pre-designated safe zone.

2.

Camera Alarm Triggered

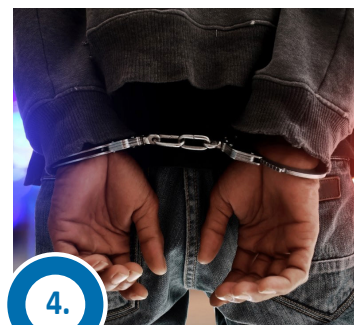

LIVE video notification instantly relayed to our 24/7 monitoring station. Security agents view onsite cameras LIVE & verify intruder.

3.

LIVE Notification Sent

Customer receives LIVE video alarm notification. Determines to take action or disregard & stand down.

4.

Police Arrive Intruder Arrested

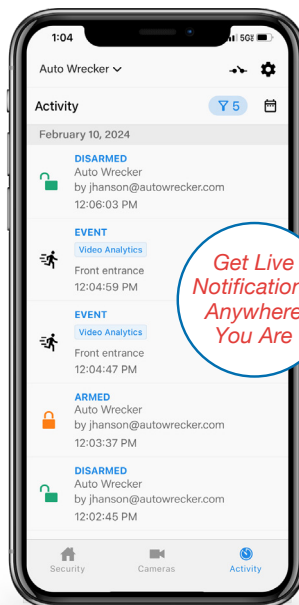

Police dispatched. Intruder arrested in the act. Crime prevented. Business secured.

Control Everything From Our User-Friendly Phone App

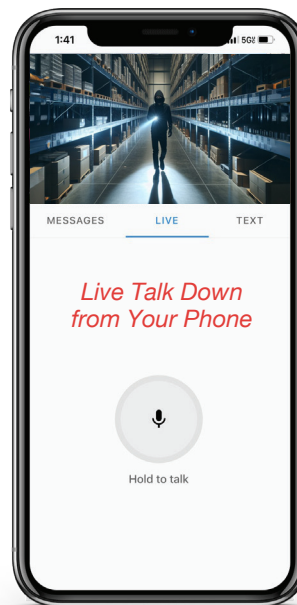

Armed Status Light

At a quick glance, red screen and lock icon indicates alarm system is armed.

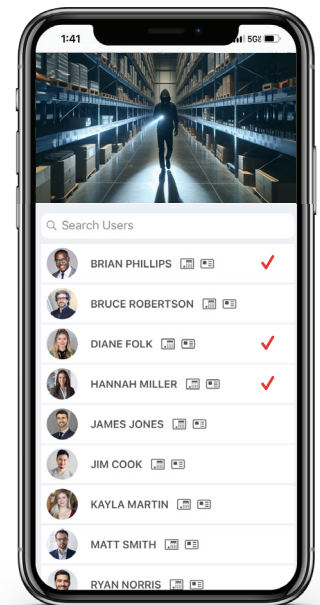

Phone Notifications

Receive notifications when a security breach is detected.

Live Talk Down

Use your phone to send a verbal warning, broadcasted through loudspeaker onsite.

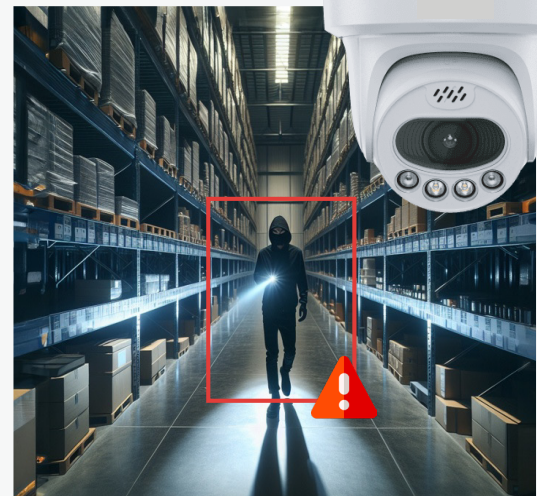

View & Share Video

Easily share saved video snippets with police or colleagues via text message.

Saves You Time & Money

- ✓ Eliminate false alarms in the middle of the night & associated penalty fees.
- ✓ Stop theft & vandalism *Before* it happens. Monitor your business from anywhere.
- ✓ Save thousands on insurance premiums, lost job time & inventory replacement costs.
- ✓ Protect your reputation by protecting your customers' property.

Cameras detect movement inside your business. Alarm Triggered. Notification sent.
